To upload video into Blackboard:

Before you continue, please run our browsercheck to make sure you are on a supported device and that all applications are up to date with the latest version or updates.

1 Use your webcam’s built-in recording software to create a recording. Once you finish your recording, make sure you save the recording on an accessible location on your device.

2 Log in to https://www.youtube.com/upload and upload the recording from your device.

3 Go to My Channel in YouTube and click on Videos.
4 Select the video you just uploaded or the one you wish to use in your course in Blackboard. Under the video you click on Embed and copy that link.

5 Navigate to the discussion forum you would like to add video to. Create a thread and fill in the appropriate subject.

6 Expand the options on the right of the text editor window (if applicable).

7 Click on the "HTML code view" button. The HTML code view button is highlighted on the image below.
8 A new window will open. Paste in this new window the embedded code you had copy from your YouTube video and click on update.

9 Your uploaded video will appear in the text editor as in the image below. Once you submit your discussion post, the video will show in the thread, visible to your peers and your instructor.
Technical Assistance
If you encounter any technical difficulties or have any questions on how to record and upload videos into Blackboard, please contact FIU Online Support Services.
